

Navigating Sage Implementation Resources

Recently Sage City underwent changes specific to the new Sage Branding. This impacted how you navigate to the various implementation resources available on this site.

Accessing an implementation resource

1. To access the list of Sage implementation resources available, click the Toolkit Resources option under Quick links as shown below.

The screenshot shows the 'Sage Implementation Resources' page. At the top, there's a navigation bar with 'United States > Sage X3' and a logo. Below the header, there's a main title 'Sage Implementation Resources' and an 'Ask a question' button. The main content area includes a description of the resources, a list of available resources (e.g., Sage X3 STREAM Implementation Methodology), and a 'News & Announcements' section. On the right side, there are buttons for 'Leave group', 'Email digest options', and 'Unbookmark group', followed by a 'Browse Forums' section with 'News & Announcements' and 'Discussion Forum'. A 'Quick links' section is highlighted with a green box, containing 'Toolkit Resources' and 'Submit an idea' links. A green arrow points from the 'Toolkit Resources' link to the 'Quick links' section.

2. From the list of implementation resources, simply select the implementation resource you want to view. Only those implementation resources you have access to display in the list.

The screenshot shows a list of implementation resources. A green box highlights the 'Data Migration Tool (DMT)' resource. The list includes:

Resource Name	Description	Page Count	Age
Data Migration Tool (DMT)	Access and download the Sage X3 Data Migration Tool	1 page	17 days ago
Fast Start Toolkit	Access the Fast Start Implementation Toolkit	39 pages	8 months ago
Sage 500 Data Migration Tool	Access and Download the Sage 500 Data Migration Tool	1 page	17 days ago
Sage Colleagues	This wiki is to be used by Sage Colleagues only. No partner access	1 page	11 months ago
Sage X3 Start	Access the Sage X3 Start Implementation toolkit	1 page	17 days ago
STREAM – Sage XRT-Advanced	Access the Sage XRT Advanced STREAM toolkit	1 page	7 days ago

3. When viewing information for a specific resource, you can use the same Toolkit resources option under Quick links to navigate back to the list.

STREAM Implementation Toolkit

The STREAM Implementation Toolkit contains a vast library of assets including documents, checklists, templates and forms to be used throughout your Sage X3 implementation. Before downloading or viewing any of the documents, follow the steps below.

Quick links

- Toolkit resources →
- Submit an idea →

Step 1: Review the STREAM Implementation Methodology Playbook

The purpose of this playbook is to provide an overview of the Sage X3 Implementation Methodology, provide a detailed explanation of the implementation lifecycle, outline the key deliverables and the stakeholders involved during each stage of the project, and reference the critical documents that should be produced and how they are used throughout the project delivery.

Bookmarks

Use Bookmarks (top right corner) to make it quicker and easier to access various implementation resource pages. You can add a bookmark to the Sage Implementation Resources page (Group) or to the various resources (Application).
